This includes a product approval process for new products and a continuous product review cycle designed to:

- ▶ help us ensure our products meet the needs of the target markets
- ▶ assess how our products are performing

Our product governance process aims to ensure all aspects of our products meet the needs of our clients and advisers throughout the product life cycle. The process focuses on:

- ▶ Our product design, including features, charges and investment options.
- ▶ Day-to-day servicing and administration of our products.
- ▶ Product distribution within the defined target market.
- ▶ Marketing including correspondence.
- ▶ Changes in market practices and regulations.

Our products are monitored on an ongoing basis and go through a formal full review at regular intervals.

Our products allow you to build a portfolio of funds to match your clients' medium- to long-term investment objectives and their attitudes to risk. In order to be added to the platform, a fund must go through a comprehensive due diligence process.

We are dedicated to providing a quality fund range, rather than simply offering any fund in the market.

Open architecture

In addition to the above investment solutions, many of our portfolio bond and investment bond products offer clients access to an extensive range of investments. We call this open architecture.

This means that, subject to our acceptance, clients can invest in a wide range of assets such as any mutual funds, shares, bonds, and structured products, as well as transfer any existing investments into their bond*. We do not review or monitor these assets in any way.

Discretionary asset managers

Our portfolio bond products can be used with discretionary asset management services.

The discretionary asset manager (DAM) can select and actively manage the investments within the portfolio to meet the requirements and objectives of the client.

You can request that we use our sister company, Quilter Cheviot, or another DAM of your choice*.

Using other discretionary services

When you and your client request a DAM, we conduct a due diligence assessment on the proposed company to ensure that we are comfortable that the firm is suitable for us to appoint. We have already approved, and are working with, a number of DAM firms, as well as our sister company, Quilter Cheviot.

* Subject to our acceptance.

A market leading range of trusts

It's important to us that the proceeds of your clients' investments go to the intended people, and at the right time, avoiding expenses and delays. We offer a range of trusts and a trustee service through Quilter International Trust company. We will also consider trusts that have been set up externally.

Our technical team is on hand to give you all the support that you and your clients may need. The team is accredited by The Society of Trust and Estate Practitioners (STEP), the worldwide association for professionals who advise families on inter generational wealth planning.

*A market leading range of trusts**

Absolute trust

Designed to help reduce a UK inheritance tax (IHT) liability where access to the trust fund is not required.

- ▶ Beneficiaries and their respective shares are named at outset and can't be altered.
- ▶ The gift into trust is a potentially exempt transfer (PET) for UK IHT purposes and after seven years, there would be no additional IHT to pay on the gift.

Discretionary trust (settlor excluded version)

Designed to help reduce a UK IHT liability where access to the trust fund is not required.

- ▶ Beneficiaries are not specified at outset but the trustees have discretion to distribute to potential beneficiaries contained within classes, i.e. children/grandchildren/nieces/nephews etc.
- ▶ The gift into trust is a chargeable lifetime transfer (CLT) for UK IHT purposes and after seven years, there would be no additional IHT to pay on the gift.
- ▶ The trust fund may be liable to periodic and exit charges in future years.

Loan trust (bare or discretionary version)

Designed to help avoid a UK IHT liability where access to the trust fund is required.

- ▶ An interest free loan is made by the settlor to the trustees who in turn make an investment into a Quilter International bond.
- ▶ The loan remains within the estate of the settlor but any growth is immediately outside of the estate for UK IHT purposes. This has the effect of 'freezing' the value to avoid an increase in estate value.
- ▶ The loan can be recalled by the settlor at their discretion.
- ▶ The discretionary trust fund may be liable to periodic and exit charges in future years.

* Please note that trust business is a regulated activity in Singapore.

Discounted gift trust (bare or discretionary)

Designed to help reduce a UK IHT liability where access to the trust fund is required.

- ▶ The settlor receives regular withdrawals during their lifetime (referred to as the 'discount'), which are valued based on age and state of health.
- ▶ The 'discount' is an immediate reduction to the estate for UK IHT purposes.
- ▶ The remaining gift (after the discount) is either a potentially exempt transfer (PET) or chargeable lifetime transfer (CLT) depending on the type of trust chosen, i.e. bare/ discretionary.
- ▶ The discretionary trust fund may be liable to periodic and exit charges in future years.

Lifestyle trust

Designed to help reduce a UK IHT liability where flexible access to the trust fund is required.

- ▶ The settlor defines, at outset, a schedule of policies from the trust fund they would like access to, and when during their lifetime.
- ▶ At each date (vesting date), the trustees can surrender the policies specified and return the proceeds to the settlor.
- ▶ The gift into trust is a chargeable lifetime transfer for IHT purposes and after seven years, there would be no additional IHT to pay on the gift.
- ▶ The trust fund may be liable to periodic and exit charges in future years.

Excluded property trust

A trust designed for individuals who are not domiciled in the UK and who want to help protect their assets outside the UK from UK IHT.

- ▶ Written as a discretionary trust, which includes the settlor within the class of discretionary beneficiaries.
- ▶ Providing certain criteria are met, an excluded property trust may never be subject to any UK IHT charges.

We will also consider trusts that have been set up externally.

Please visit the 'Trust planning' pages within the Technical Centre of our website

www.quilterinternational.com for more information on trusts.
