

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

MULTIPARTNER SICAV - RobecoSAM Smart Energy Fund,

a sub-fund of the MULTIPARTNER SICAV
(ISIN: LU0175571735, share class: B - EUR)
GAM (Luxembourg) S.A., part of GAM Holding AG, manages this Fund

Objectives and investment policy

- The Fund is an actively-managed, thematic equity product offering investors pure access to a high-impact, sustainable investment theme. The Fund seeks to provide long-term capital appreciation by investing in high-quality, attractively-priced securities that contribute to the transformation of the energy sector towards cleaner, more efficient alternatives.
 - The Fund provides clients with concentrated equity exposure on sustainable companies diversified in focus across renewable energy enablers and producers, "smart-grid" distribution networks, energy-efficient storage and power management technologies, and the electrification of end-use applications.
 - A dedicated thematic equity team incorporates SI research within fundamental analysis and stock valuations. Impact assessments of controversial incidences affecting portfolio holdings provide additional risk management. An active ownership and engagement team interacts directly with management of fund holdings, offering additional channels for sustainable impact.
 - The Fund employs systematic, bottom-up stock selection that combines proprietary Environmental, Social & Governance (ESG) data and research throughout the investment process. ESG criteria for exclusions and theme-specific suitability are applied during universe construction. Moreover, an in-house Sustainability Investing (SI) research team integrates financially-material sector and company-specific sustainability analysis into investment cases.
 - The damaging effects of climate change and tougher emission standards means companies focused on forward-looking solutions like cleaner energy production, reduced energy consumption, optimized power management and efficient infrastructure are in a position to benefit from long-term growth.
 - The Fund may hold a relatively large amount of liquidity (max. 49%). The Fund may use complex financial instruments (e.g. derivatives) to hedge the Fund assets and to profit from promising investments.
- The Fund also has the following characteristics of importance to investors:
- The Fund follows a benchmark index which represents the global equity market. In the selection and weighting of Fund investments, the Fund is independent of the benchmark index.
 - Investors may buy or sell the Fund on any bank working day in Luxembourg.
 - The Fund has several share classes. These may differ with regard to charges, currency and the use of income.
 - Income is reinvested in the share class.
 - The Fund directly contributes to UN Sustainable Development Goals (SDGs) via its focus on cleaner energy sourcing, consumption and innovations in industry and infrastructure applications.
 - Recommendation: the Fund is appropriate for investors with a long-term investment horizon that plan to invest for five years or more.

Risk and reward profile

The above indicator shows the risk-return characteristics of the Fund based on its historical performance over the last five years. Where a 5-year performance history is not available, the history has been simulated on the basis of an appropriate benchmark index.

- The Fund is assigned to the category indicated above because of the fluctuations in its value in the past.
- The indicator helps investors to have a better understanding of the potential gains and losses related with the Fund. In this context, even the lowest category does not represent a risk-free investment.
- The past performance of the Fund provides no indication of its current or future performance.
- This allocation to a risk category may change over time because the future performance of the Fund may fluctuate differently than in the past.
- The Fund does not offer the investor a guaranteed return. Nor does it guarantee the fixed repayment of the money invested in the Fund by the investor.

The indicator takes account of those risks which are entailed in the Fund's net asset value. These mainly involve fluctuations in the value of investments. In addition to the risks expressed through the indicator, the Fund's net asset value may also be significantly affected by the following factors:

- The Fund invests in assets which are generally easy to trade and may therefore be sold at their market value under normal circumstances. However, it cannot be ruled out that in certain extreme situations (e.g. market turbulence) the tradeability of the assets in the Fund may be limited. In such situations, it may be possible to sell the assets in the Fund only at a loss, which will reduce the value of the Fund.
- The political, legal and economic situation is often unstable in emerging economies and can be subject to rapid and unforeseen changes. This may have a negative impact on international investors as well as on the capital markets of such countries. Accordingly, the performance of Funds which invest in such countries may be negatively affected.

Charges

The costs borne by you are used to pay for the management of the Fund and its distribution and marketing. These costs reduce the Fund's performance.

One-off charges taken before or after you invest

Issue fee	3.00%
Redemption fee	0.00%
Conversion fee	2.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	1.94%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee

None

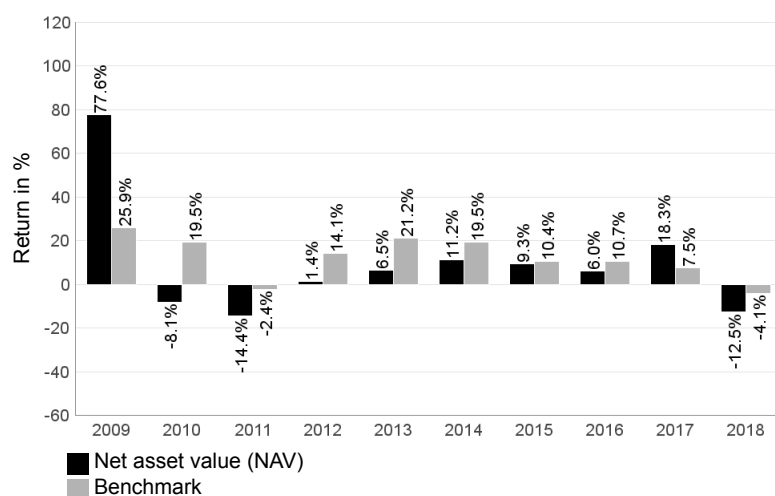

Both the issue and redemption fees and the conversion fees are maximum rates. You may be charged less than this. Your advisor will be able to provide you with further information.

Ongoing costs are calculated at the end of the financial year. The figure may differ from year to year. It does not include:

- Transaction costs, except if the Fund has to pay issue and redemption fees to buy or sell other collective investments.

Further information on costs is provided in the full prospectus. This can be downloaded from the websites www.funds.gam.com and www.fundinfo.com.

Past performance

- Past performance provides no indication of current or future performance.
- The performance data refer to the net asset value. Fees incurred on issue, redemption or exchange (e.g. transaction and custody charges incurred by the investor) are not included.
- Activation year of the share class: 2003
- Past performance has been calculated in EUR.

Practical information

- The custodian is State Street Bank Luxembourg S.C.A., 49, Avenue J. F. Kennedy, L-1855 Luxembourg.
- Further information on this Fund or other share classes or sub-funds of the SICAV may be found in the prospectus, in the articles of association, in the most recent annual report and subsequent semi-annual reports of the SICAV, and may be obtained from the head office of the SICAV and from national representatives and distributors or on the website www.funds.gam.com. These documents are available free of charge on request in an official language or in English.
- The net asset value is published daily at www.funds.gam.com and www.fundinfo.com.
- The SICAV is subject to Luxembourg tax law. This may affect your personal tax situation.
- GAM (Luxembourg) S.A. may be held liable only on the basis of a statement included in this document which is misleading, erroneous or incompatible with the relevant parts of the UCITS prospectus.
- Investors have a right of exchange between the sub-funds of the Luxembourg SICAV.
