Global Climate Change Equity

a sub-fund of Schroder International Selection Fund SICAV

Class A Accumulation EUR Hedged (LU0306804302)

This fund is managed by Schroder Investment Management (Europe) S.A., which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth by investing in equities of companies worldwide which the investment manager believes will benefit from efforts to accommodate or limit the impact of global climate change.

Investment policy

The fund is actively managed and invests at least two-thirds of its assets in equities of companies worldwide. The investment manager believes that companies that recognise the threats and embrace the challenges early, or that form part of the solution to the problems linked to climate change, will ultimately benefit from long term structural growth which is underappreciated by the market. We expect these companies to outperform once the market recognises these stronger earnings growth dynamics.

The fund is managed with reference to material environmental, social and governance factors. This means issues such as climate change, environmental performance, labour standards or board composition that could impact a company's value may be considered in the assessment of companies.

The fund may also invest directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

Benchmark

The fund does not have a target benchmark. The fund's performance should

be compared against its comparator benchmark, being the MSCI World (Net TR) index. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of a benchmark. The performance of this share class is compared against the performance of the equivalent unhedged currency share class.

Dealing frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution policy

This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Risk and reward profile

Lower risk

Potentially lower reward

Higher risk

Potentially higher reward

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Currency risk: The fund may lose value as a result of movements in foreign exchange rates.

Currency risk/hedged share class: The hedging of the share class may not be fully effective and residual currency exposure may remain. The cost associated with hedging may impact performance and potential gains may be more limited than for unhedged share classes.

Emerging Markets & Frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Derivatives risk – Efficient Portfolio Management and Investment Purposes: Derivatives may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. When the value of an asset changes, the value of a

derivative based on that asset may change to a much greater extent. This may result in greater losses than investing in the underlying asset.

Charges

One-off charges taken before or after you invest

Entry charge 5.00%

Exit charge None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over a year

Ongoing charges 1.87%

Charges taken from the fund under certain specific conditions

Performance fee

None

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2019 and may vary from year to year.

You can find more information about the charges in Section 3 of the fund's prospectus.

Past performance

Performance achieved between 2010 and 2019 was achieved in circumstances that no longer apply. The fund's investment policy was changed on 19 February 2020.
